

# EMC Insights

EMC Insights is a global provider of energy efficiency program implementation services and software products

## About Us

EMC Insights (EMC) specializes in acquiring and analyzing energy data to design and deliver EE and RE programs. EMC was formed in 2020 from the restructuring of EcoMetric's business units and is certified nationally as minority owned business.

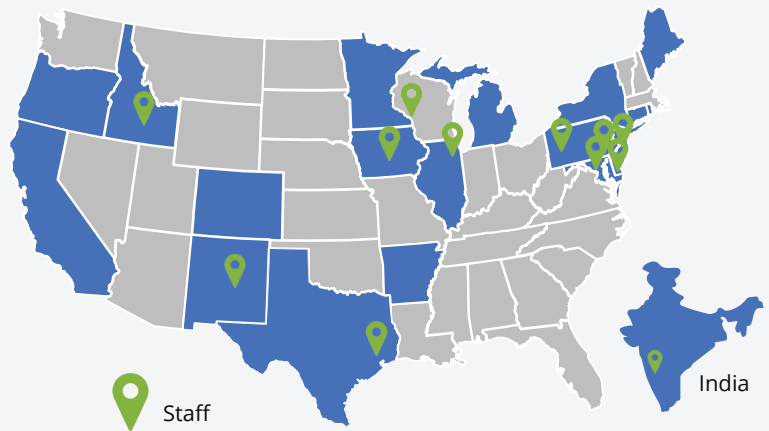

EMC has experience in the following areas:

- Program design and development
- Turnkey Program implementation
- Data driven customer targeting
- In-depth engineering
- Quality assurance and control
- Onsite and Virtual M&V

EMC has developed proprietary software to measure and track energy and carbon impacts of decarbonization efforts.

## Where We Work

We are active coast to coast from California to New Jersey.

## Broad Expertise

Carbon Emission Accounting  
and Cost Effectiveness

Emerging Technologies  
and Market Transformation

Program Administration

Engineering and Technical Support

Customer Segmentation  
and Targeting

BIL and IRA Guidance

Evaluation and Regulatory Support

Program Planning and Design

Outreach Support

QA/QC Inspections/Verification
